### **New cooperation between Swiss Aviation Training and infoWERK for Technical Recurrent Training such as Human Factors or Fuel Tank Safety**

infoWERK is pleased to announce the new agreement on a cooperation with Swiss Aviation Training (SAT). The purpose to joint together is to enforce the promotion and distribution of infoWERK products by making use of SAT's distribution channels, especially for Technical Recurrent Training such as Human Factors and Fuel Tank Safety Training.

Swiss Aviation Training Ltd. (SAT) is the training center of Swiss International Air Lines and highly recognized for its excellence in providing training services for aviation- and non-aviation markets. SAT is located beside Zurich Airport with a workforce of some 300 employees. infoWERK as an established provider of aviation software solutions is happy to welcome SAT as its new cooperation partner.
