### Swiss AviationTraining cleared to offer CRJ100/200/700/900 maintenance type ratings

February 16, 2010

The Swiss Federal Office of Civil Aviation (FOCA) has confirmed EASA Part 147 approval of Swiss AviationTraining (SAT) as a provider of maintenance type rating training for the Bombardier CRJ100/200 and CRJ700/900 aircraft types.

These approvals will enable SAT to further expand its training services portfolio, which already includes B1, B2, combined B1+B2, C, A and Level 2 technical training courses and practical training for the Avro 146/RJ, the Embraer ERJ 135/145/Legacy, the Embraer 170/190/Lineage and the Saab 2000.

Swiss AviationTraining has also announced a first customer for its new Bombardier maintenance type rating training – Lufthansa Technik of Stuttgart, Germany.
