

Swiss Aviation Training Offers Bombardier CRJ100/200 AND CRJ700/900 Maintenance Type Ratings

Switzerland's Federal Office of Civil Aviation (FOCA) approved Swiss Aviation Training (SAT) as a provider of EASA Part 147 maintenance type rating training for the Bombardier CRJ100/200 and CRJ700/900 aircraft. Swiss Aviation Training already signed Lufthansa Technik as its first customer for the new Bombardier maintenance training.

With these latest EASA approvals, Swiss Aviation Training (SAT) can expand its training services portfolio. SAT now holds the full range of maintenance training approvals for the various jet aircraft used on regional air services around the world. The company already offers B1, B2, combined B1+B2, C, A and Level 2 technical training courses and practical training for the Avro 146/RJ, the Embraer ERJ 135/145/Legacy, the EMB 170/190/Lineage and the Saab 2000.
